TRANSPORT BELT CONVEYOR
The Union Transport Belt Conveyor is designed to transfer flat substrate materials from one processing system to another with ease. Depending on the customers application, many times this type of conveyor is incorporated after materials have been laminated and are then transported to a stacking area or another inline manufacturing process.

Construction: Heavy wall welded tubular steel and plate steel construction

Conveyor: Powered belt driven conveyor – belt material can include: Teflon, Nitrile, PVC, SBR Rubber

Power: 1 HP AC variable speed Motor; with 110-volt controls

Speed: 30 to 100 I.f.p.m.

Safety: Emergency push stop buttons located in multiple positions.

The overall width and length of the conveyor is all determined by each customers specific needs.
