## UNION SERIES #55, 110" ROTARY LAMINATOR

This rotary laminator (pinch roll machine) was built to provide laminating pressure between several substrates in the construction of walls and floors for the RV industry.

The machine incorporates two 12" diameter rubber-covered laminating rolls. The upper roll is adjustable from 0 to 6". The rolls are powered by an AC variable-speed motor, providing a speed range of 20 to 100 feet per minute. Two 6" diameter air cylinders provide the laminating pressure, which can be varied by the air pressure adjustment of the regulator located on the machine.

Along with our Union Series #55, Union Tool also offers a Union Series #65, which incorporates 14" diameter rolls with roll widths up to 156".

These are two of the many special rotary laminators built by The Union Tool Corporation.
