UNION PRESS BLANK FEEDER-COATER **Silicone Coating Applied with Precision Control!**

Union Tool introduces the Silicone Roller Coater! Now you can get all the benefits of our full line of automatic roller coaters, PLUS a new silicone application that's revolutionizing the plastics industry!

- ◆ Applies a silicone release coating to the top side, the bottom side, or both sides of plastic web material or sheet plastic before it is formed into packaging containers
- ◆ Plastic extruders can now sell precoated materials
- ◆ No more messy and uneven spray methods, squeegee coaters or dip tanks. The Silicone Roller Coater applies a consistent, precision-controlled coating so thin it's not even visible to the end user
- ◆ Won't stick to forming dies as plastic is being formed
- ◆ Available in sizes from 14" up to 74" wide
- ◆ Automatic pumping system pumps coating from pvc tank to the rolls of the roller coater for even, controlled application.

For free information and engineering specs on our full line of Roller Coater Systems, call Union Tool today!
